ServiceSphere Main Pages

Home Page:

1. User Authentication:

 - User Types: The platform caters to two user types - clients and freelancers.

 - Registration Information: Users are required to provide first name, last name, email, password, country, and agree to terms and conditions.

 - Additional Feature: Users have the option to sign up conveniently using their Google accounts.

 - Verification Process: A robust verification process is implemented to ensure the authenticity and security of user accounts.

2. User Onboarding:

 - Intuitive Design: Craft an intuitive and visually appealing home page design.

 - Platform Overview: Display a clear and concise platform overview, emphasizing benefits for both clients and freelancers.

 - Call-to-Action Section: Include a prominent call-to-action section for users to register or log in.

 - Service Categories: Organize services into categories such as Engineering & Architecture, Development & IT, Event Planning, and Education.

3. Search and Filtering:

 - Search Bar: Implement a search bar allowing users to search for freelancers, jobs, or projects.

 - Freelancer Filtering: After searching for freelancers, users can apply filters based on location, category, hourly rate, job success, earned amount, hours billed, and English proficiency to refine search results.

 - Freelancer Data: Each freelancer's profile displays relevant information, including name, category, country, hourly rate, job success rate, description, and skills.

Freelancer Side:

1. Profile Creation and Management:

  - Comprehensive Profile: Freelancers can create a comprehensive profile with personal information, skills, experience, education, and portfolio.

  - Profile Sections:

    - Home Section: Specify experience level, goals, and preferred work style.

    - About Yourself Section: Upload CV or enter professional details.

    - Work Experience Section: Add, update, or delete work experience details.

    - Education Section: Provide educational background details.

    - Languages Section: Add languages and proficiency levels.

    - Skills Section: Use an algorithm or AI to recommend jobs based on skills.

    - Overview Section: Write a comprehensive bio with a minimum character count of 100.

    - Categories Selection Section: Choose categories that match expertise and indicate offered services.

2. Exploring the Platform:

  - Once the profile is set up, freelancers have access to various sections, including job listings, client profiles, and platform features.

3. Finding Jobs:

  - Freelancers can search for available job listings based on skills, categories, and preferences.

  - They can browse through job listings, review details, and save or bookmark listings for future reference.

Client Side:

1. Posting Jobs:

   - To initiate a project, clients post a job listing.

   - Provide details such as job title, category, required skills, project size, duration, experience level, compensation, job description, and file attachments.

   - Clients specify project duration and if it's a long-term or short-term project with a contract-to-hire opportunity.

   - After filling required information, clients can review the job post and save it as a draft or publish it.

2. Managing Job Listings:

   - Clients view and manage posted job listings.

   - Track progress, view applications and proposals, and communicate with freelancers through the integrated messaging system.

   - Clients can edit or update job posts if necessary.

3. Inviting Freelancers:

   - In addition to receiving applications, clients can proactively invite freelancers to apply.

   - Search for freelancers based on criteria and send invitations with project overviews.

4. Reviewing Proposals:

   - Clients review and evaluate proposals based on freelancer experience, skills, terms, and additional information.

5. Hiring Freelancers:

   - Once clients review proposals, they make a hiring decision.

   - Extend offers to freelancers with project details, terms, and compensation.

   - Freelancers accept or negotiate the offer, and the client and freelancer proceed with the project.

   - Clients have access to sections like saved talents, recently viewed freelancers, and their hired freelancers.

6. Notifications:

   - Clients receive notifications about updates, job applications, and messages.

7. Reports (Services):

   - Clients can generate reports containing transaction history related to services utilized.
